

Lloydminster Transportation Infrastructure Master Plan Update

Help Plan Lloydminster's Future

Dear resident/business owner;

Lloydminster is a fast growing and vibrant city and I am asking for your input on making sure our streets and pathways are pleasant, safe and efficient to use.

In the past decade the City has grown by over 20%, far outstripping our original 2001 Transportation Infrastructure Master Plan. The City of Lloydminster, together with ISL Engineering and Land Services are undertaking a strategic planning process to update the City's Transportation Infrastructure Master Plan to respond to this unprecedented growth as well as plan for future growth and development.

Consultation with Lloydminster residents and businesses is an important component of the planning process. Your involvement in this process will help shape our City's future. Currently, there is an ongoing Transportation Infrastructure Master Plan survey to gather the views of residents on current transportation issues. The survey is available online on the City of Lloydminster website (www.lloydminster.ca) and in hard copy at the City Hall for anyone who wishes to respond on paper. **The survey will be available until November 20, 2009.**

This update will establish a policy framework and capital budget guide that reflects the collective vision of the citizens of Lloydminster. The updated plan will guide Council's decision making on future transportation infrastructure within our City.

I encourage you to get involved by completing the survey or speaking to our Transportation Infrastructure Master Plan Input Team at the Lloyd Mall Food Court on Thursday, November 5, 2009 from 3:00-7:00 pm. We want to hear from you!

Watch the Meridian Booster, Lloydminster Source and the City website for future opportunities to get involved.

Sincerely,

Mayor Ken Baker
